EXPERIENCE

Fullstack project

Nasa-Practice!

📅 Jan 2022 – Mar 2022   📍 Antalya, Tr

- I built a full-stack project where users are able to select their Destination Exoplanet , Rocket type , Mission Name and Launch Date then launch their mission .
- I was able to create Rocket types with parse CSV file in node.js and save it in database before server is running . upcoming tab in this project is for check launches and delete them . then you can check delete launches in history tab with red lable .this project has sound effect too and was able to use PM2 for handle requests well.
- the main technologies that I've used are React , Node.js and MongoDB .

Backend node.js development

Pong-Game

📅 Mar 2022 – Apr 2022   📍 Antalya, Tr

- I built a full-stack project (focus on backend) where 2 users can play Pong game each other with socket.io.
- I was able to create socket.io server on node js and client side which allows users to play each other in rooms. and run express js side by side too.
- The main technologies that I've used are socket.io , node js , express.js .

Node.js & Telegram Bot

Combo-editor

📅 2022   📍 Antalya, Tr

I built telegram bot for edit combos in PSN market . clients uploaded their combo txt file and after 3 minutes my bot editing their combo file automatic and sent them after rename file as username.txt .

This bot just accepted txt file limited and was selling monthly to clients to edit their files as well as original file .

The main technologies that I've used are node.js , Telegraf.

Freelance

📅 2020 - 2022   📍 Antalya, Tr

Built an ecommerce webapp to sell products online. Increased company sales.

Developed a launch website in EC2 service on AWS and Boosted streaming sales.

SUMMARY

Node.js web developer and network engineer seeking back-end developer role. Over 2 years of experience building back-end components and connecting applications to web-based services. High competencies in back-end JavaScript components and database systems.unstoppable in learning and growing.
